Art Unit 1713

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 and 16-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Murata et al., U.S. Patent 5,292,811.

Reference to Murata et al. specifically teaches the cross-linking and dynamically heat treating of polypropylene (co)polymers as required by applicants' claims with the peroxy compounds as required by applicants' claims specifically disclosed as preferred. The specific requirement of increasing

Art Unit 1713

the melt strength and/or the extensional melt viscosity is not specifically disclosed in the reference but is presumed to occur during the cross-linking as it does for applicants in their disclosure. The treatment of the same polymers with the same treating agents under the same conditions would be presumed to produce the same physical modification absent evidence to the contrary, In re Fitzgerald et al., 205 USPQ 594. The reference even teaches the use of "monomers" in conjunction during the treatment as can be seen in column 18 of the reference. Specific mention of vinyl butyrate and vinyl stearate represent monoene monomers suggested and disclosed. Applicants' claimed process is, therefore, either fully anticipated or rendered prima facie obvious under In re Fitzgerald practice absent evidence of structural difference or physical difference in the products and commensurate in scope to the claims.

2. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claim 20 is allowed. Both claims 15 and 20 contain the novel characteristic of requiring the presence of styrene during the modification of the polypropylene polymers. Although the references cited in this application do teach modification of polypropylene with monomers present, these monomers are disclosed

Art Unit 1713

either for further cross-linking thereafter or for auxiliary cross-linking during the peroxy treatment, as seen in reference to Murata et al. Nowhere is there a suggestion that styrene in any way would contribute to the modification of the polypropylenes, nor is motivation provided for one of ordinary skill in the art to incorporate styrene into the reaction. These claims, therefore, contain patentable subject matter, and claim 15 is objected to and claim 20 is, therefore, allowed.

4. Applicants' amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE

Art Unit 1713

ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
